

# CLEAN AGENT FIRE SUPPRESSION SYSTEM FOR CRITICAL INSTALLATIONS

Safe and reliable fire protection for large, high-risk environments, delivered through an FK-5-1-12 based clean agent system that protects critical infrastructure and complies with NFPA 2001.

## INFERNO SHIELD (FK-5-1-12) FIRE SUPPRESSION SYSTEM

The Honeywell Inferno Shield system is designed to suppress fire, protecting critical assets and minimizing downtime. It complies with NFPA 2001 standards for occupied spaces, enabling quick recovery and business continuity after fire incidents.

# USP'S

## ON-SITE CLEAN AGENT REFILLING

- Reduced Downtime and ensured operational continuity.
- Lowered Logistics Costs.

## LEAK FREE DESIGN

- Significantly reduced hardware requirements and failure rates.

## MINIMAL FOOTPRINT

- Up to 50% reduction in required floor space.

## EXTENDED REACH

- Supports Pipe Lengths exceeding 100 Mtrs.

### Fire Suppression

Extinguishes fire within 10 seconds, minimizing potential damage.

### Safe for Occupied Spaces

Uses a non-toxic agent that is safe for human presence.

### Minimal Downtime

Rapid suppression enables faster operational recovery and continuity.

### Environment Friendly

Zero ozone depletion potential ensuring environmental responsibility.

## CERTIFICATIONS & STANDARDS

UL-listed Solution

PESO approved Solution

## APPLICATION AREAS

DATA CENTERS

TELECOM CENTRES

ARCHIVES & MUSEUMS

INDUSTRIAL

PROCESS CONTROL ROOMS

AVIATION & DEFENSE
