Wide network of distributors

Easy To Commission
Simple & powerful programming

Easy To Operate
Colour-based interface menu

Easy To Maintain
Embedded graphic diagnostics tool

Easy To Expand
Takes an additional loop card

Easy To Connect
CLSS compatible

MORLEY LT

Compact & Capable Fire Panel

LT-159

Addressable fire panels that simplify installation and commissioning, by self-identifying sensors, input modules, sounder/VADs, using a radio system gateway.

Morley LT panels come in variants that are designed for Agile™ radio equipment and allow a maximum of 32 devices (LT-32), or 159 devices (LT-159).

Compact footprint	
Advanced protocol	
Reliable and code-compliant	
32/159 addressable devices	
Touchscreen configuration	
Temperature range 0°C to 40°C	

MORLEY PLUS

Analogue Addressable Control Panel

PL-1000

Designed for small to medium sized installations, this panel can connect both traditional wired devices and Agile™ wireless equipment.

Its coverage is expandable from single to two loop installations using an optional loop card, with each loop supporting 159 detectors and 159 input/output modules.

Compact footprint

Advanced protocol

Reliable and code-compliant

Supports 159 detectors and modules

Touchscreen configuration
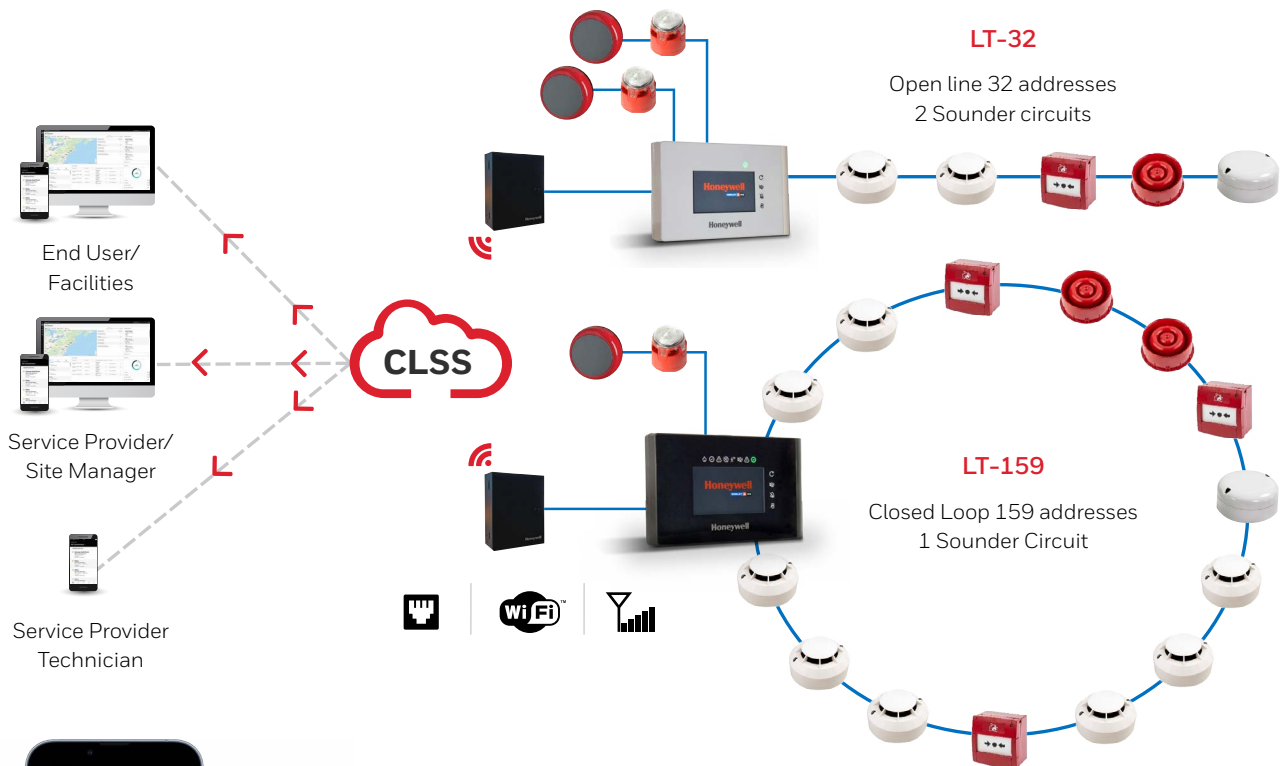

Coverage up to 2000 Sq Mts

Intuitive Colour-Coded Interface

Morley LT & PLUS panels feature a 4.3" touchscreen with menus
that enable quick and easy system configuration.

All-in-one platform to commission, monitor, maintain, and audit

A unified and cloud-based platform for control, optimization, quick diagnosis
and configuration, when used with the Honeywell Advance Protocol (AP).
